TITLE : CONTROLLER

ABSTRACT : PROBLEM TO BE SOLVED: To constitute a controller system capable of facilitating title selection in a reproducing device particularly good at accessing such as a CD player, a video CD player or a DVD player.

SOLUTION: This controller 4 is composed of an optical disk reproducing device 1, communication circuits 7 and 8, a display device 5 and an inputting means 6. When a reproducing disk is inserted, a photograph and a name related to a title desired to be reproduced are displayed on the display device 5 and the title is reproduced by pressing the inputting means 6 on the display device indicating the content of the title even without considering a track number, a title number or the like.
